

**Game title:** The game's title is Pizza Panic. The player is delivering pizzas, if they don't deliver pizzas, they'll get fired. The scenario is fun because the player is driving around the map delivering pizzas to and from places under a time limit, which creates a sense of urgency. The controls will be fair to keep the scenario fun.

**Core gameplay:**

- You start at the pizza restaurant your character works at, and receive a list of pizzas that must be delivered to certain buildings.
- There won't be many pizzas to deliver in the early levels though as the game progresses, more pizzas will be added.
- More customers will place orders as the levels progress, so the player has to travel to more places across the map.
- The goal for the player is to deliver the pizzas to the right customers before they get angry and deduct points and give a strike. 3 strikes, and the player is fired.
- The player can not only steer, and turn, they are able to boost, or in other words accelerate.
- This boost allows the player to go faster at the cost of using up a section of their boost meter.
- The boost meter slowly replenishes over time, and can be fully restored if the player picks up a gas can on the map.
- The lose condition is if 3 customers don't get their pizza in the allotted time frame, the game ends, and the player is fired.
- The win condition is to avoid activating the lose condition in the level's allotted time frame. Each level has a time limit of about 5 minutes.
- As mentioned before, there will be a time limit, each level lasts about 5 minutes, the player must survive those 5 minutes to advance to the next level.
- Additionally, the customers will have a time limit representing their patience, if that runs out, the player receives a strike, the time limit will probably be 45 seconds to a minute.

**Game Objects and Mechanics:** The player controls a pizza delivery vehicle that drives around the map to collect pizzas and later deliver them to customers. The player moves with the WASD keys, W goes forward, A and D steer to the vehicle's left and right respectively, and D reverses. The player can press space to accelerate if they have boost in their boost meter. You collect pizzas at the restaurant, and you can collect gas containers to restore your boost meter. You can also collect pizza slices to increase your score, and clocks to extend the time limit. The main obstacle players must avoid are the walls and buildings populating the map. When you hit a wall, you lose your momentum. You deliver your pizzas at the house listed in the player's delivery list.
